

## STUDENT WORKSHEET

### A Look inside the Lab: Safety Hoods

#### Vocabulary

Using resources suggested by your teacher, find definitions for the terms below.

Anaerobic bacteria	
Chemical fume hood	
Cell line	
HeLa cells	
Laminar flow hood	
Personal protective equipment (PPE)	

## Lesson Questions

1. List three different types of safety hoods and why each one is used.
2. Explain the importance of proper lab etiquette and safety.
3. List five safety rules when in a lab setting.
4. Using an example from the reading passage, describe what you learned about lab safety or what surprised you. Make sure your answer specifies which example you used and includes three to five sentences.
